- Data Structures

## PROJECTS

### BeWell

- **Tech Used:-** Html, Css, Javascript, Node Js.
- It is a web app that analyses the mental and psychological health conditions of user.
- It provide solutions for improving mental health conditions like meditation app, breathing app, music app, night stories, doctor session scheduler. Also, it keeps a track on user's activity in each solution section.
- It provides additional features like community session scheduling and medicine donation.

### YelpCamp

- **Tech Used:-** Html, Css, Javascript, Node Js, Ajax, Express Js, Mongo DB.
- YelpCamp is a web app where user can explore the campgrounds shared by other users and comment on them. User can also share their campgrounds and even update and delete them.
- In addition to information about campground user can also add multiple images of their campground. There is also a map placed on each campground according to the location shared by the user.
- There is a world map placed on the first page where a user can select campground according to their area preference.

### Fashion-Hub

- **Tech Used:-** React Js, Hooks, Firebase
- It is a E-Commerce Website where user can purchase any clothing stuff or accessories safely, with their all cards acceptable.

### Front-End Projects

- **Tech Used:-** Html, Css, Javascript.
- Built 20+ with great UX/UI. But, just a pretty website is WASTE of YOUR RAM, if it loads in a millenia.
- So that's why website loading speed, and its optimizations are important to me.

## ACHIEVEMENTS

- Reached top 10 in Various Hackathon.
- HackTheCrisis Hackathon Finalist.
- Golden Badge on Hackerrank.
